

To,

Mrs. Meghana Manoj Palwe
for Fuel Additive LLC
120 Eglinton Avenue E
Suite 1100
Toronto, ON

Ref: Usage of Your fuel additive FA 6048 at our site.

As per our discussion, we have tested your Fuel Additive (FA 6048) in our TATA Hitachi EX 350 Excavator machine, being used at Cummins India Pune site, for more than 100 hours and the results are as follows:

DATE	No. OF HOURS	USAGE OF FA 6048(LTRS)	AVERAGE DIESEL USED(LTRS)PER HOUR		SAVINGS for 100 hour operations
			Before FA 6048	After FA 6048	
01/09/2013 To 15/09/2013	More than 100 hours.	30 ml for 150 Liter.	35	30.80	Around 12%

There was a saving of around **12%** on our diesel bill while using your Fuel additive FA 6048. Also, this is to confirm that we observed the engine becoming smooth and carbon emission is found to be reduced.

In the past we have tried other additives but was not satisfied with the results we got.

But we are really happy with the results with your additive (FA 6048) and plan to use it on all our heavy earth moving machinery.

**Thanking you
yours Faithfully,
Maruti Earth Movers**
